

## Our Healing Amenities

Beyond the natural beauty that surrounds our campus, we've designed our facility to support a new lifestyle free of drugs and alcohol. We understand how physically taxing the detox process can be, and we're here to make it as comfortable as possible.

One of our most popular amenities is Biosound Therapy. It's incredibly effective for coping with anxiety and depression, helping to relax your nervous system and promote deep relaxation. Think of how you feel when you hear your favorite song—certain vibrations and sounds can make you feel safe, comforted, and in control. Biosound Therapy uses these principles to help break negative thinking patterns and replace them with positive ones.

In addition to Biosound Therapy, we offer a range of other amenities designed to support your overall well-being. Our state-of-the-art fitness center includes regular yoga classes led by a trained instructor. We also provide weekly acupuncture, massage, and chiropractic services to promote holistic healing.

Our private, in-house chef prepares delicious, nutritionist-approved meals to ensure you receive the best nutrition during your recovery. After a long day, you can unwind by our sparkling outdoor pool. For those who need to stay connected with work, we have a business center where you can remotely address your responsibilities.

We're committed to providing a supportive and healing environment, and we believe these amenities can make a significant difference in your recovery journey. Our serene and homelike environment fosters peace and tranquility, providing a stark contrast to the bustling chaos often found in a hospital wing.
