

Family Wellness Program

At Beach House Center for Recovery, we recognize that addiction affects not just the individual, but their entire family. Our Family Wellness Program is designed to offer love, connection, and support to the family members of those struggling with substance use disorders. This inclusive, optional service is available to the relatives of current and former clients, ensuring that families receive the assistance they need throughout their loved one's recovery journey.

We provide a support network for the loved ones of our patients, acting as a liaison to answer any questions and guide them through the treatment process. While we are not clinicians, we can refer families to medical providers if necessary. Our Wellness Coordinators reach out within 72 hours of a loved one's admission and continue with bi-weekly calls until the treatment program is completed. This ensures that families remain informed and supported during the recovery process.

Family involvement is a cornerstone of effective treatment. The support and understanding of loved ones can significantly enhance a patient's recovery journey, providing the necessary encouragement and stability. Their love, empathy, and understanding are vital components in helping patients navigate the complexities of recovery.

*Leslie Williams, LMHC, MS, CCTP, CSTS
Executive Clinical Director*

Upon discharge, the Wellness Program continues to offer support, answering questions and connecting families to additional recovery resources. Eligibility for the program is granted to any family member whose loved one is in treatment or has completed treatment at Beach House, provided the client has signed a consent form authorizing their participation. There is no limit to the number of family members who can participate, as long as consent is given. This comprehensive approach helps families navigate the challenging path of recovery, ensuring they are supported every step of the way.
